DETAILED ACTION

Claim Rejections - 35 USC § 102

Claim Rejections - 35 USC § 103

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 10-27 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Velly et al. US 5,848,644 or WO 93/25798 to Anselme et al.

4. Each of the cited documents shows the formation of lactam copolymers with (meth)acrylate comonomers, see column 3 lines 20-50 of Velly et al. and '798 at page 3 lines 30+. The documents further describe using the copolymers in methods for reducing gas hydrates. The documents are silent as to the water solubility limitation of the claims. Given that these are the same copolymers, it is reasonable to presume that the polymers of the prior art possess properties that anticipate or render obvious those claimed.
